

Quick User Guide

The first screen is the main screen that shows all the contacts list, full name.

Main screen has following functionalities :

1. Search button at the top : Search contacts using either First name, Middle name, Last name, phone numbers or address. It takes a single string and search the database to give matched contacts in the table format.
2. Add Contact button : Click this to add new contact which opens a new form and save the entered information in the DB.
3. Delete button : Select the contact from the contacts table which you want to delete and then click delete button. This deletes the contacts from DB and refreshes the contacts table.
4. Modify button : Select the contact you want to modify/update from the contacts table, the select the type of information you want to modify from the dropdown on the right and click modify button.
